Maciej Mindowicz

Personal Details:

- **Phone:** 662 852 878
- **E-mail:** maciejmindowicz@gmail.com
- **LinkedIn:** https://www.linkedin.com/in/mackmind
- **About me:** https://mackmind.github.io/about
- **Address:** Gdańsk

Professional Profile:

As a systems and data analyst with over 10 years of experience in aviation and navigation technology, I combine root cause analysis (RCA) and first- and second-line support for a suite of critical CAD tools with requirements gathering and testing (UAT, smoke), as well as process automation (PowerShell, Python). I achieve high efficiency by maintaining a knowledge base and making proficient use of AI agents.

Professional Experience:

2018 - 2026

Boeing Poland and Jeppesen ForeFlight
Systems and Data Analyst, later Senior Product Operations Specialist

- **Support and analysis:** First- and second-line support for aeronautical chart production tools; root cause analysis (RCA) of logs and architecture diagrams; translating tickets into development requirements and acceptance criteria.
- **Environment administration:** Pre-configuration of remote desktops, administration of the CAD environment, permissions management and synchronisation of resources between environments.
- **Quality assurance and deployment:** Designing test scenarios, performing prototype validation, smoke tests and UAT; coordinating system downtime windows and managing application decommissioning.
- **Automation and AI:** Developing scripts (PowerShell, Batch, Python), launchers and self-service tools; modernising network resource connection processes with the use of AI agents.
- **Business continuity and quality:** Developing emergency workarounds, representing the team during ISO 9001:2015 audits, delivering induction training and maintaining the knowledge base.

2014 - 2018

Jeppesen, a Boeing Company
Aeronautical Information Analyst
Creation, editing and quality control of airport charts and approach procedures.

2010 - 2014

Regional Police Headquarters in Gdańsk - English interpreter,
Institute of European Initiatives - Translator of European projects,
BMT ARGOSS - Software trainer for the PODGiK land registry computerisation,
University of West Bohemia in Pilsen - Internship under the IAESTE programme,
Geopartner - Office and field surveying internships.

Skills:

AI tools: 10-11.2026 - Meta Global AI Developer Hackathon
Codex, Claude Code, Qoder, DSH, Hermes, Omniroute

Software: Microstation, AutoCAD – Autodesk ATC intermediate-level certificate; Atlassian JIRA and Confluence, ALM, JAMA, ServiceNow, PagerDuty, SnapComms, BPA Automate, FME, Microsoft Office (including Visio, Project and Access), FlexApp, DBeaver, Mathcad, Adobe Photoshop, ESRI ArcGIS

I hereby consent to the processing of my personal data for the purposes of recruitment.

Methodologies:	Root cause analysis (RCA); definition of requirements, dependencies, acceptance criteria and test scenarios; testing: prototype validation, smoke tests, user acceptance testing (UAT), ISO 9001:2015
Programming languages:	Python, PowerShell, VBA, SQL, MS Batch, Bash, R
Driving licence:	category B
Interpersonal skills:	Conscientiousness and consistency in pursuing goals, knowledge sharing, creativity

LANGUAGES:

English — Advanced in speech and writing.
Years of experience in an international team, CAE certificate with grade A.

EDUCATION:

2017 - 2018
Data Engineering – Data Science
– postgraduate studies at Gdańsk University of Technology
Diploma thesis: *Concept of a model for improving warranty multi-process management in terms of formal and technical compliance in the automotive sector*, together with Piotr Sliż and Piotr Czubek

2013 - 2014
Navigation with a specialisation in Offshore Technologies
– master's degree at Gdynia Maritime University
Master's thesis: *Assessment of position accuracy of GPS and GPS/GLONASS phase solutions using active geodetic networks in precise navigation*

2011 - 2016
Engineering Management with a specialisation in Work Environment Engineering
– engineering studies at Gdańsk University of Technology
Engineering thesis: *Project to improve the workflow of the information processing department at a surveying company*

2009 - 2013
Geodesy and Cartography with a specialisation in Urban and Industrial Geodesy
– engineering studies at Gdańsk University of Technology
Engineering thesis: *Comparison of approximation methods for straight and curvilinear track sections*
awarded the best engineering thesis of the Faculty in 2013

COURSES:

2015 - 2017

DataCamp: Data Scientist with Python, Data Analyst with Python, Python Programmer

Coursera \ University of Michigan: Mental Models

Canvas.net \ Embry-Riddle Aeronautical University: 101 Aviation

PCC-CERT: Internal quality management systems auditor according to ISO 9001:2008 and ISO 9001:2015 - *on-site course with certificate*

MG Centrum: Internal auditor of management systems:
information security (ISO 27001), environment (ISO 14001), occupational health and safety (PN-N 18001), quality (ISO 9001),
workshop for auditors and ISO system representatives in accordance with ISO 19011.

Jeppesen: Crucial Conversations

Recreational

Stanford University and University of British Columbia: Game Theory,
University of Tokyo: Introduction to Game Theory,
University of Pennsylvania – The Wharton School: Gamification,
Institut Mines-Télécom: Introduction to Satellite Communication,
California Institute of Technology: Exploration of the Solar System
(via the Coursera platform).

Net Akademia: EQ – emotional intelligence, NLP – neuro-linguistic programming,

MG Centrum: speed reading and accelerated learning course.

INTERESTS:

New technologies, science fiction literature, 3D printing, strategy games, amateur travel photography, old B-movies.

I hereby consent to the processing of my personal data for the purposes of recruitment.
